

习题课5/5: Disk scheduling

Question #1: 课堂1题

- There is sequence of disk track requests: 96 58 82 36 168 130 150 25 184.
- Assume that the disk head
 - is initially positioned over track 100
 - and is moving in the direction of increasing track number.
- Question: For FIFO/SSTF/SCAN/C-SCAN
 - What is the tracking order?
 - What is Average Track Length?

answer

FIFO		SSTF	
Next track accessed	Number of tracks traversed	Next track accessed	Number of tracks traversed
96	4	96	4
58	38	82	14
82	36	58	24
36	46	36	22
168	132	25	11
130	38	130	105
150	20	150	20
25	125	168	18
184	159	184	16
<u>Average seek length</u>	<u>66.4</u>	<u>Average seek length</u>	<u>26</u>

answer

SCAN		C-SCAN	
Next track accessed	Number of tracks traversed	Next track accessed	Number of tracks traversed
130	30	130	30
150	20	150	20
168	18	168	18
184	16	184	16
96	88	25	159
82	14	36	11
58	24	58	22
36	22	82	24
25	11	96	14
<u>Average seek length</u>	<u>25.7</u>	<u>Average seek length</u>	<u>34.9</u>

FIFO

SSTF

SCAN

C-SCAN

Question #2:

- There is sequence of disk track requests: 75 62 99 144 50 162 110 26 198.
- Assume that the disk head
 - is initially positioned over track 100
 - and is moving in the direction of **decreasing** track number.
- Question: For FIFO/SSTF/SCAN/C-SCAN
 - What is the tracking order?
 - What is Average Track Length?
